

# Duotek<sup>®</sup>

Authorization Number: A-7356-007

Antimycotoxin agent,  
Organophilic aluminosilicate

## USE IN:

## FORMULA:

Each 100 g contain:

K <sub>2</sub> O .....	4.30 g
Na <sub>2</sub> O .....	1.80 g
CaO .....	5.20 g
Excipient s.q. ....	100 g

## INDICATIONS:

Innocuous product, efficient in the elimination of polar mycotoxins such as aflatoxins, and non polar mycotoxins such as zearalenone. Its surface characteristics allow it to have high affinity also for ochratoxin A, fumonisins and trichothecenes. For use in breeder birds, broilers, growing pigs, breeder pigs, milk and meat bovines.

## ADMINISTRATION ROUTE:

Oral, added to feed.

It is recommended to use 1 to 3 kg of product per ton of finished feed.

## WARNINGS:

For exclusive use in the elaboration of feed for animals. Contact with eyes and skin may cause irritation. Use protective goggles and dust mask. A uniform mixing in the finished feed must be made to obtain the maximum benefits of Duotek<sup>®</sup>

## STORAGE:

Must be kept in a dry, ventilated place.  
Keep away from the reach of children and domestic animals.  
PRODUCT FREE OF HEAVY METALS, DIOXINS AND FURANS

## PRESENTATION:

Net content: 25 kg.
